Typography

The Galderma typeface is unique, welldefined, and high-end. It's crafted to exude the precision linked to Galderma's expertise and carries a high degree of credibility - which is vital in our industry.

Countered with our secondary typeface Segma the typographical design conveys how our heritage meets cutting-edge science.

PRIMARY

Our primary typeface, GALDERMA, is a bespoke typeface developed exclusively for and owned by Galderma. It consists of three weights: Regular, Italic, and Bold.

GALDERMA is used for headings, quotes, and display copy across all touchpoints.
We use Galderma's bespoke typeface for essential corporate tools and events such as annual reports, advertising, GAIN, and CEO events, to name a few.

We will also use our bespoke typeface across some of our sub-brand graphic identities.

Latest update: 7. December 2022, 10:07.

GALDERMA REGULAR
ABCDEFGHIJK
NOPQRSTUVWXYZ
abcdefghijklmn
opqrstuvwxyz

abcdefghijklmn
opqrstuvwxyz
123456789

!?"#€%&/()=.:,;/*-+

SECONDARY

Segma (Regular, Italic and SemiBold - stylistic set 01)
is our secondary typeface.

It is used for body copy, e.g., on our website, in ads, and in our Annual Report.

SEGMA REGULAR
ABCDEFGHIJK
NOPQRSTUVWXYZ
abcdefghijklmn
opqrstuvwxyz
123456789

SEGMA BOLD
ABCDEFGHIJK
NOPQRSTUVWXYZ
abcdefghijklmn
opqrstuvwxyz
123456789

!?"#€%&/()=.:,;/*-+

FALLBACK TYPEFACES

In all Microsoft templates, we use one or both of our fallback typefaces; Constantia and Arial.
Constantia replaces our primary typeface GALDERMA and Arial replaces our secondary typeface Segma.

CONSTANTIA
ABCDEFGHIJK
NOPQRSTUVWXYZ

123456789

!?”#€%&/()=.:,;/*-+

EXPRESSIVE TYPOGRAPHY

The Galderma typeface can be used in different ways to create attention or other typographic expressions. To maximum impact, designs with expressive typography should only be used occasionally.

Large-scale typography

The Galderma typeface can be used in various designs at a large scale, where the typography can be cropped by the format, at various scales.

This method of treating type makes it appear more illustrative and the details of the bespoke Galderma typeface are highlighted.

This can be used to create more expressive layouts and a more bold expression.

Embossed typography

For special events or initiatives, an embossed effect can be used on the Galderma typeface – eg. President's Club and CEO Awards.

The effects mimics embossing and the technique of carving into metal. It is a premium finish technique that links well to the premiumness of the Galderma brand.

This effect should only be used in limited amounts to make sure it creates maximum impact when used. To keep the feel and appearance premium, it is an effect for special occasions.
