WELCOME TO THE GAIN BRAND PLAYBOOK

GAIN is not just what we do, it’s how we are recognized around the world by our customers. As a global brand, GAIN represents the highest standards in aesthetic education. It signals excellence, expertise, and innovation—before a single word is spoken. Consistency in how we present GAIN is critical. Every asset we create and every experience we design shapes perception. By adhering to our global brand standards, we protect and elevate the premium nature of GAIN worldwide.

© Galderma 2026

TOGETHER, WE:

CREATE A COHESIVE AND RECOGNIZABLE GLOBAL IDENTITY

ELEVATE THE PERCEIVED VALUE OF OUR EDUCATION AND SCIENCE

BUILD LASTING TRUST WITH OUR COMMUNITY OF INJECTORS

ENSURE EVERY TOUCHPOINT REFLECTS THE QUALITY OF GAIN

This playbook is your guide to delivering that consistency—bringing the GAIN brand to life with clarity, confidence, and impact.

© Galderma 2026

LOGO SYSTEMS

© Galderma 2026

Our **digital** logo treatment is simple yet bold, featuring sharp gradients that emulate directional lighting and reflect the background colors. This creates a clean expression of luxury combined with confidence.

Our **printed** logo treatment is simple and practical, allowing high-quality reproduction.

© Galderma 2026

Logo system
Digital and print

In order to manage production quality, we have two different approaches to our logo treatment for **digital** and **print** (and all other formats).

Do not use the incorrect version for the medium you are working with.

Please see the following pages for the full guidelines for each medium.

Digital only: Gradients

Print and any other format: Solid colours

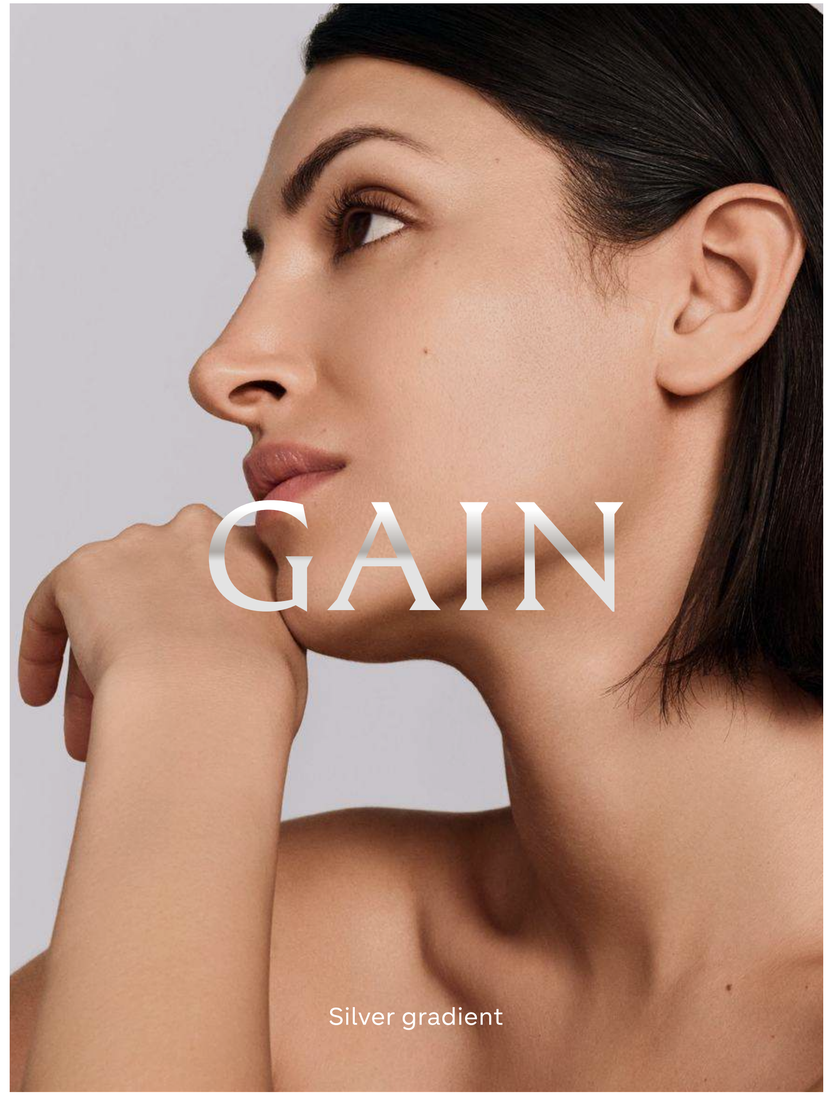
© Galderma 2026

For digital use only, we are introducing two new versions of the GAIN logo, in two different gradients.

These should be used in specific contexts, as explained on the following pages.

Do not introduce more gradient variants.

Do not use these in print or any non-digital media.



© Galderma 2026

Logo system
Digital: gradients
Deep blue gradient

The deep blue gradient is the primary expression for the GAIN brand. It represents expertise and confidence.

This gradient is only used with the corresponding background gradient.

This is for digital use only.

© Galderma 2026

Logo system
Digital: gradients
Silver gradient

We use the silver gradient GAIN logo version on top of photography and video.
It delivers the strongest contrast while remaining crisp.

Do not use this gradient with any other type of background.

This is for digital use only.

Main

Lock up

© Galderma 2026

© Galderma 2026

Logo system
Print: solid logos

For print and all other non-digital media, we use the GAIN logo with solid fills.

These should be used in specific contexts, as explained on the following pages.

Whilst it’s acceptable to use these digitally, we prioritise use of the gradients there for a stronger brand expression.

Do not create logo and background combinations that are not detailed here.

TYPOGRAPHY

© Galderma 2026

We primarily use Segma Medium for high-level communications; as such, it provides strong contrast with the GAIN logo, typeset in the Galderma font. Additionally, Segma is a clear and legible font that reads well over images and videos.

© Galderma 2026

Typography
Hierarchy

The GAIN design hierarchy* works with three levels of typesettings:

Level 1: Largest font size, all caps.
Level 2: Large font size, all caps.
Level 3: Small font size.

*Examples on the next page

The Segma font can be obtained via the Galderma Brand Center.

When Segma is not available, you may use Arial. This should be avoided in high-level marketing materials.

© Galderma 2026

The layout consists of three hierarchical tiers stacked vertically on a centered axis. Each tier can shift vertically for layout flexibility.

Text content appears above imagery, with the imagery featuring people/content as visual supporting elements.

Level 1: Largest font size, all caps.
Level 2: Large font size, all caps.
Level 3: Small font size.

This layout is a wireframe, not a design example.

Galderma logo
Always at the top

Headline
Level 1 (ALL CAPS)

- Faculty
- Event / Location
- Product

Sub headline
Level 2 (ALL CAPS)

- Dates
- Location

Supportive
Level 3

- Extra information
- Description
- Calendar / Schedules

© Galderma 2026

The system is modular and information can move on a vertical axes, giving multiple options in designs.

This layout is a wireframe, not a design example.

© Galderma 2026

Typography
headlines and quotes

For longer documents such as presentations, PowerPoint decks, and similar materials, we also use the Galderma font for headlines, in line with the existing Galderma brand guidelines.

The Galderma font can be obtained via the Galderma Brand Center.

When Galderma font is not available, you may use Constantia. This should be avoided in high-level marketing materials.

© Galderma 2026

This layout is a wireframe, not a design example.

Constantia

GAIN

With Dr. Firstname Lastname

COLOR PALETTE

© Galderma 2026

The GAIN color palette draws from Galderma's signature dark blue and lavender, creating a sophisticated, elegant foundation. Complementing these primary colors, two carefully selected gray tones provide depth and support the refined chrome effect within GAIN's typographic treatment.

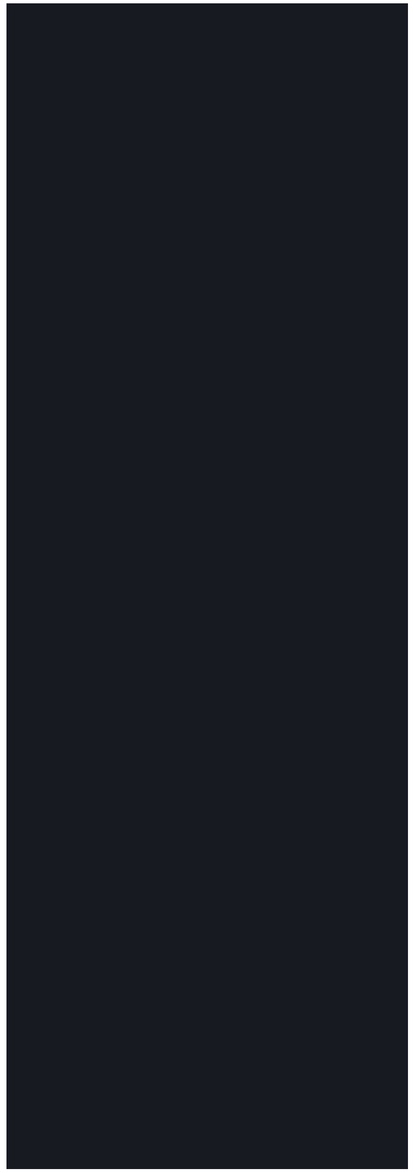
© Galderma 2026

Colors
Palette

This is our full color palette.

To create stand-out moments we prefer use of typographic styling, such as increased type size, all caps and highlight boxes using the brand colours.

Do not introduce other colours to materials.

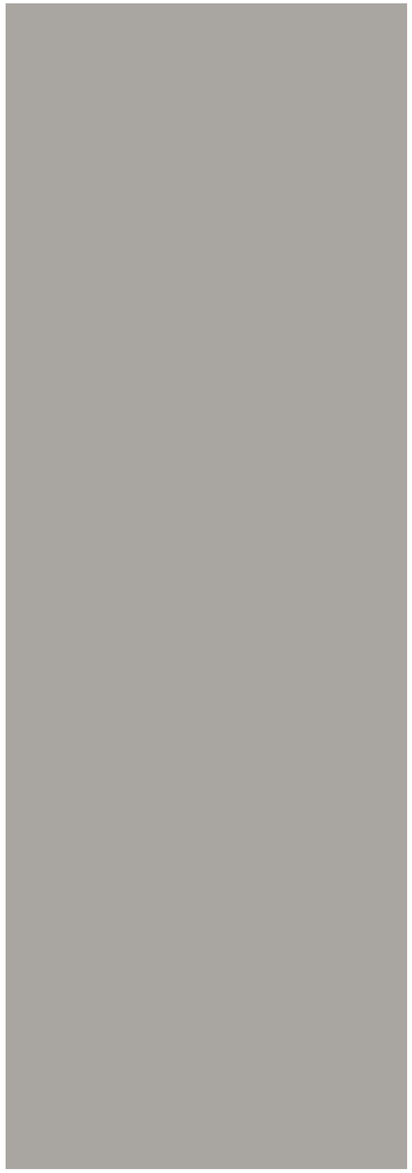


Galderma dark blue

HEX	#181B21
RGB	24, 27, 33
CMYK	100, 70, 40, 0

Galderma Lavender

HEX	#BECDF0
RGB	190, 205, 240
CMYK	24, 14, 0, 0



Gradient Gray

HEX	#A9A5A0
RGB	169, 165, 160
CMYK	0, 2, 6, 34

Gradient Light Gray

HEX	#E3E3E3
RGB	227, 227, 227
CMYK	0, 0, 0, 11

© Galderma 2026

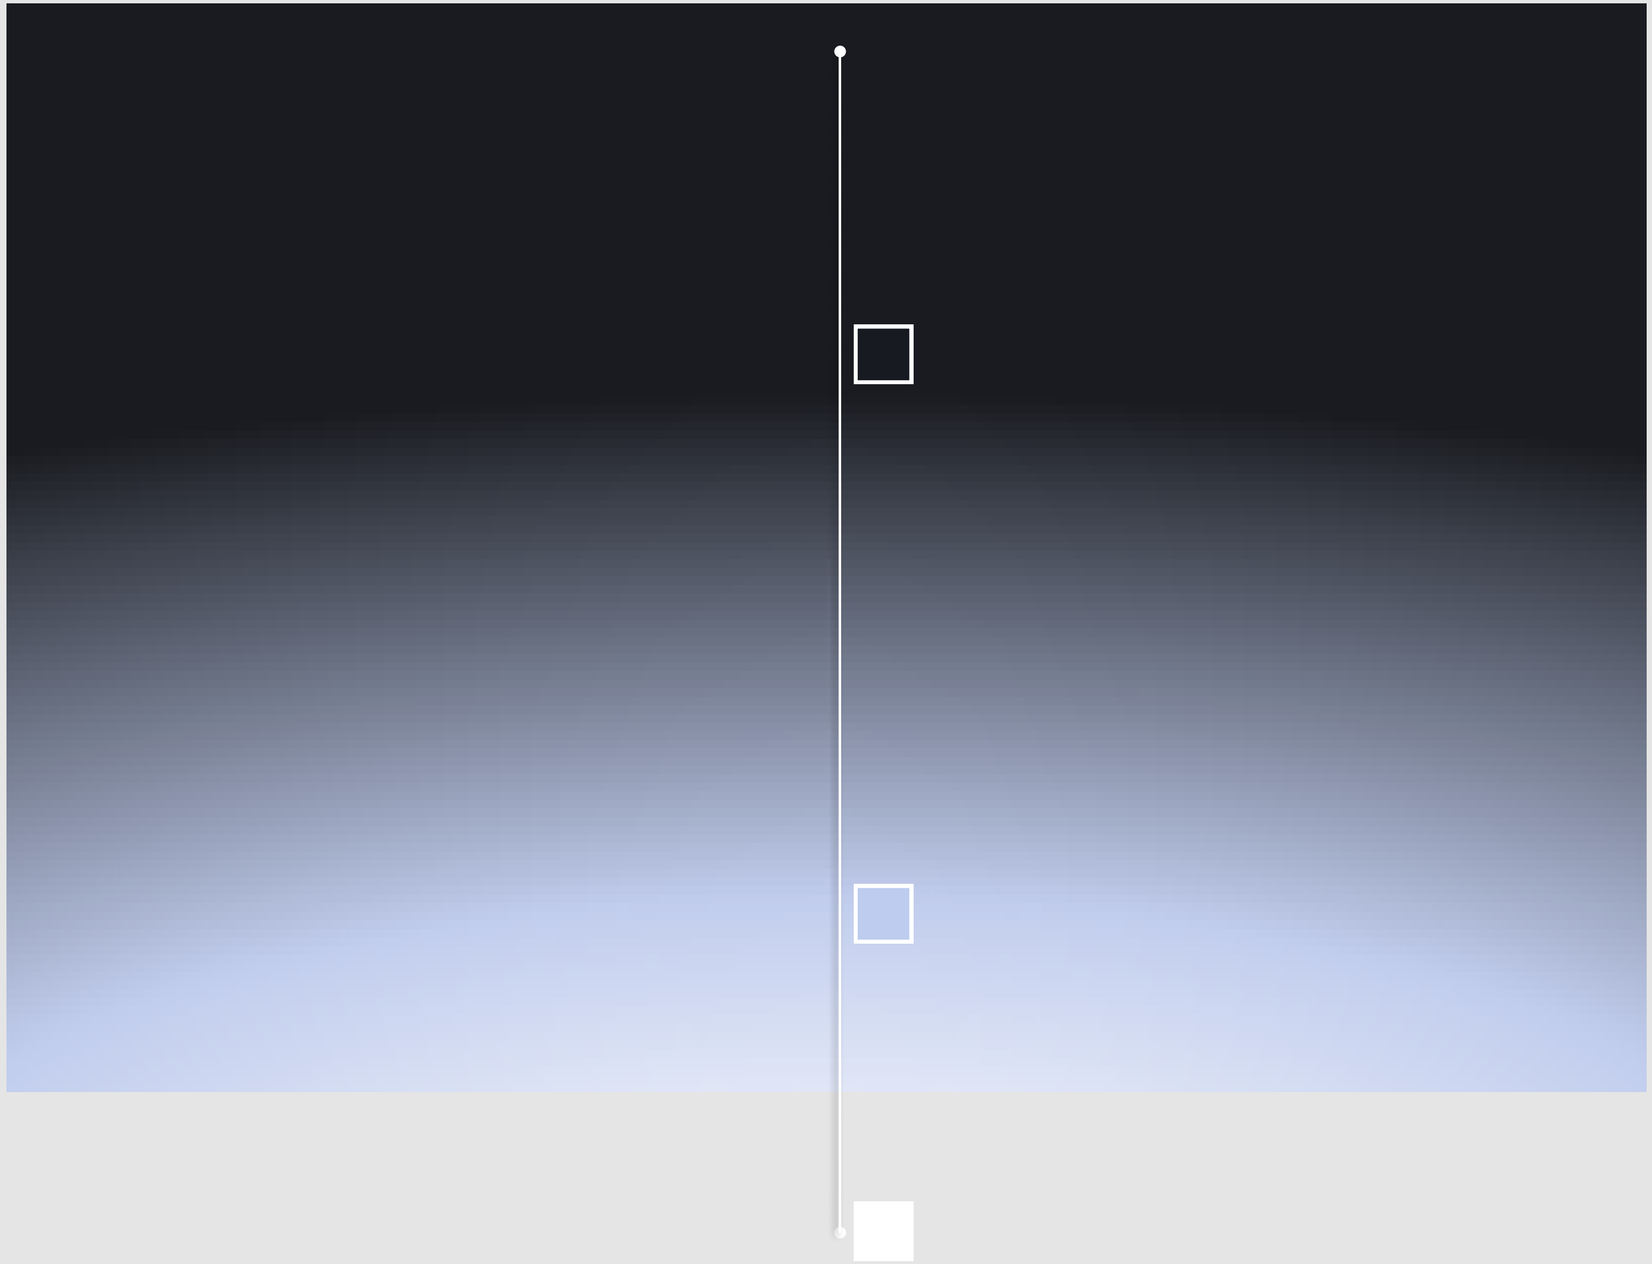
Colors
Digital background gradient

Outer color: Galderma Dark Blue
Center color: Galderma Lavender
Gradient type: Radial
Angle: 0 degrees

This creates a radial gradient radiating from the center outward, with the lavender at the center fading to the dark blue at the edges, positioned at 0 degrees to create that sense of circular lighting.

We only use the combination of these two colors for the background gradients.

THIS IS FOR DIGITAL USE ONLY.



© Galderma 2026

Colors
Digital logo gradient

Top color: White
Center color: Galderma Lavender
Lower color: Galderma Dark Blue
Gradient type: Linear
Angle: 0 degrees

This creates a linear gradient radiating from the top down, with the Galderma Lavender at the center fading to the Galderma Dark Blue at the bottom, positioned at 0 degrees to create that sense of directional lighting.

***This logo and gradient is only to appear over the background gradient or Galderma Lavender color. Never over photography or video.**

THIS IS FOR DIGITAL USE ONLY.

© Galderma 2026

Colors
Digital logo gradient

Top color: White
Center color: Gradient Gray
Lower color: Gradient Light Gray
Gradient type: Linear
Angle: 0 degrees

This creates a linear gradient radiating from the top down, with the Gradient Gray center fading to the Gradient Light Gray at the bottom, positioned at degrees to create that sense of directional lighting.

Use a gray low opacity overlay where needed to create enough contrast between gradient logo and background image.

***This logo and gradient is only to appear over photography or video.**

THIS IS FOR DIGITAL USE ONLY.

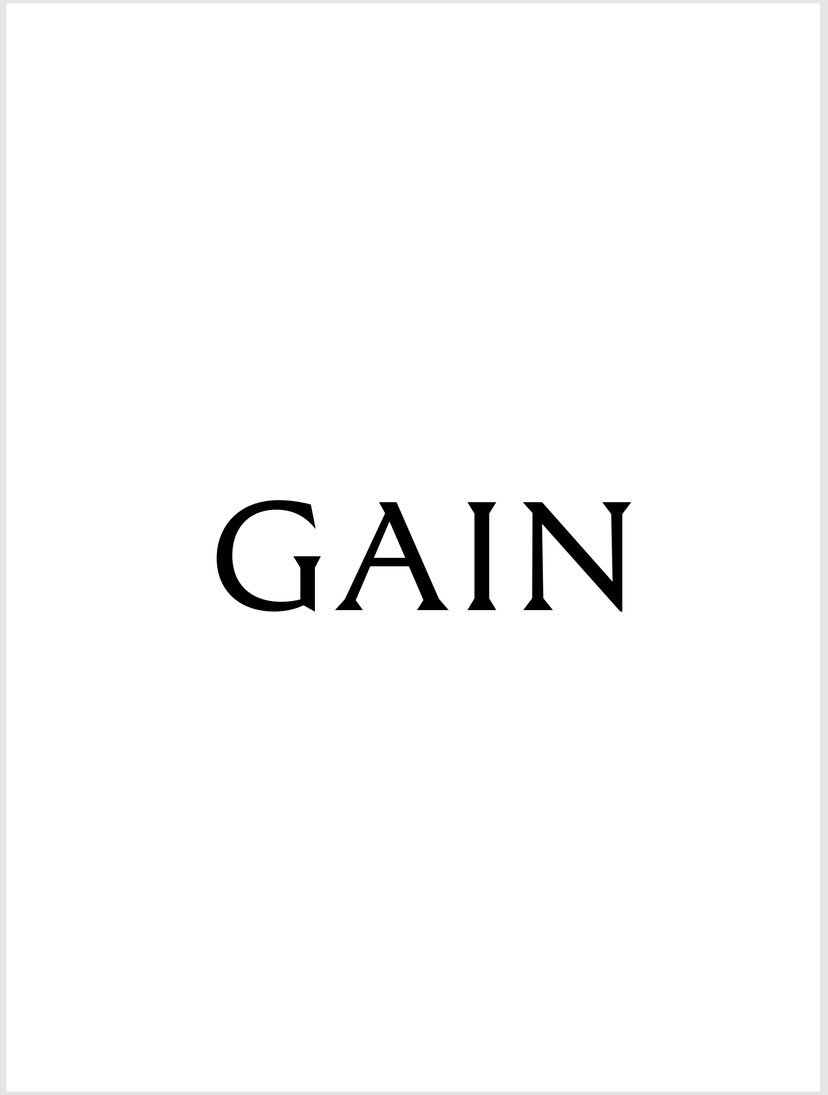
© Galderma 2026

Colors
Black logo

When placed on a white background, the GAIN logo must always be displayed in black.

In digital uses: This version is typically used as footer branding at small scales within presentations, such as PowerPoint. It can be positioned at either the top or bottom of the slide and should be center-aligned.

In all other uses: This can be used as the main logo expression, overlayed over white or lavender.



© Galderma 2026

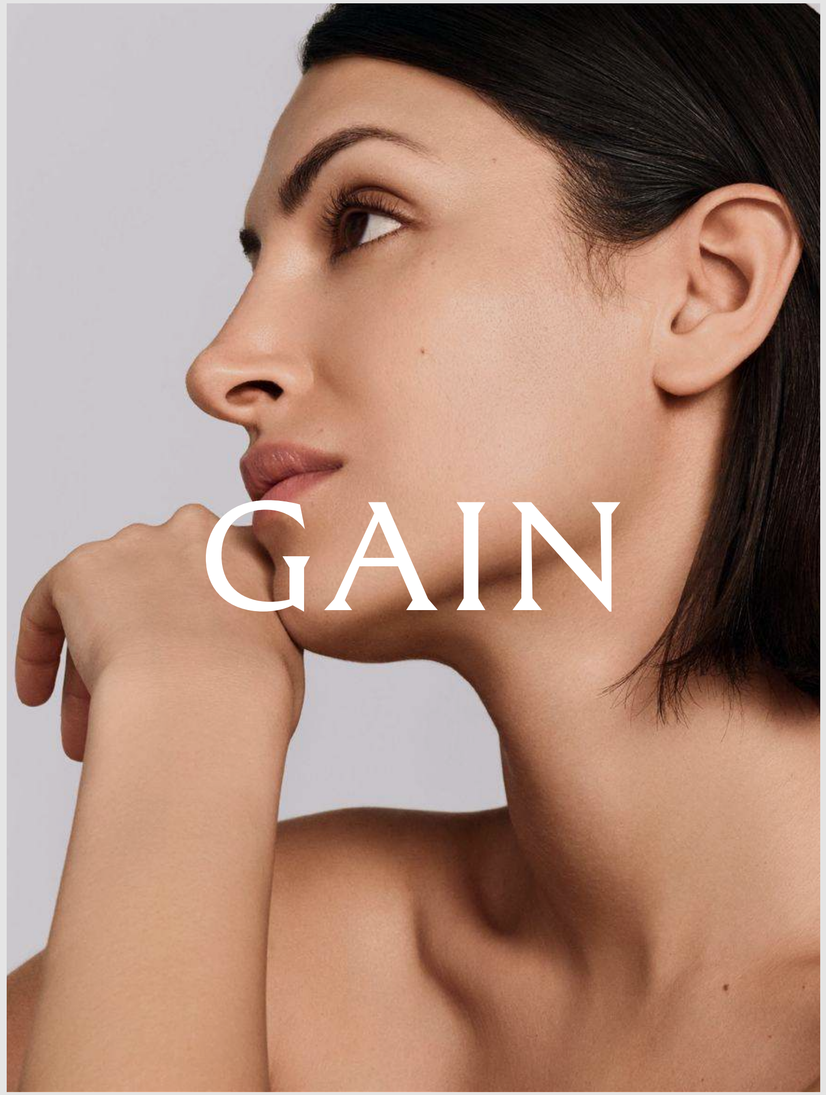
Colors
White logo

When placed on a black background, the GAIN logo must always be displayed in white.

In digital uses: This version is used when the gradient cannot be, for example as small sizes.

In all other uses: This version is used over black or image backgrounds only.

GAIN

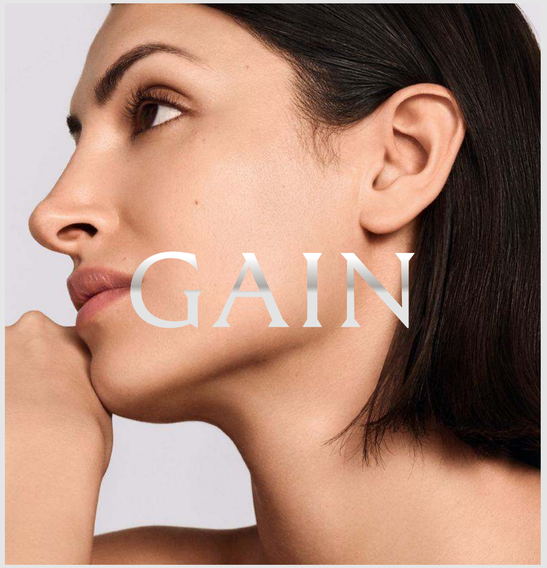


© Galderma 2026

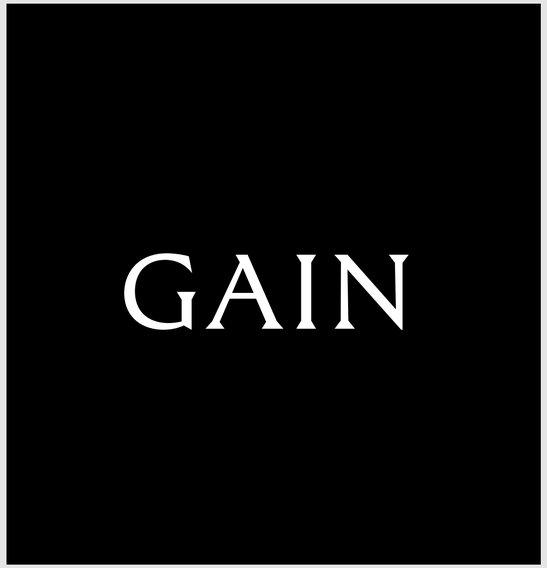
Colors
Overview: Digital

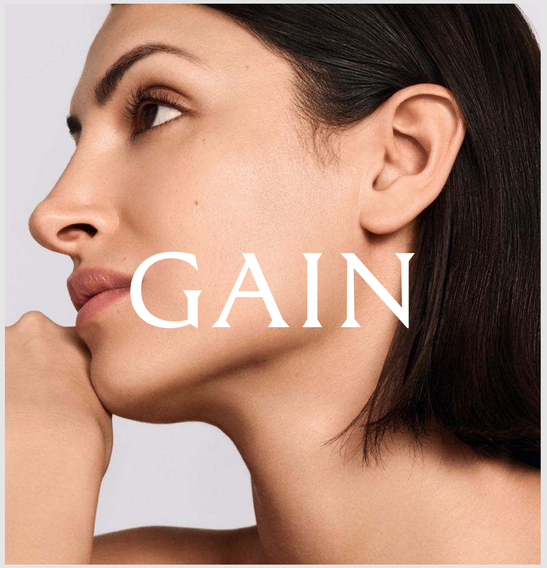
We prefer use of the gradient or lavender and black in digital media to create the strongest possible brand expression.

It is also acceptable to use the black or white logo combinations where necessary.



Preferred





Acceptable

© Galderma 2026

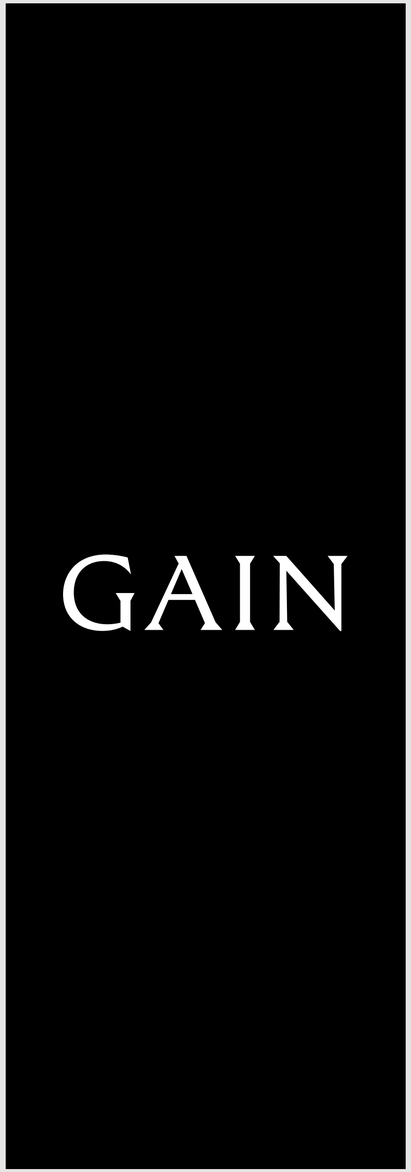
Colors
Overview: Print and non-digital media

For print, these are the only acceptable colour combinations.

DO NOT USE GRADIENTS IN PRINT.

White on image

Black on lavendar



White on black

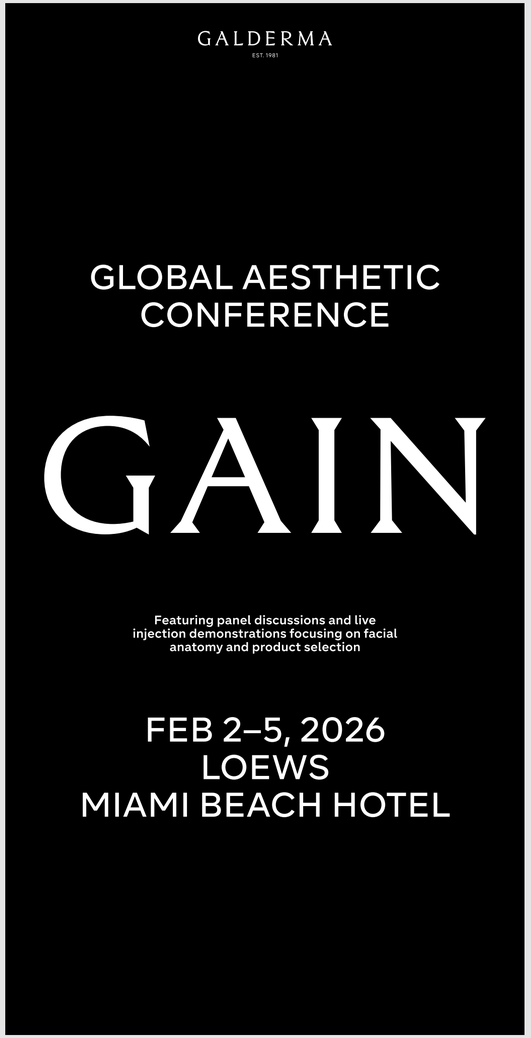
Black on white

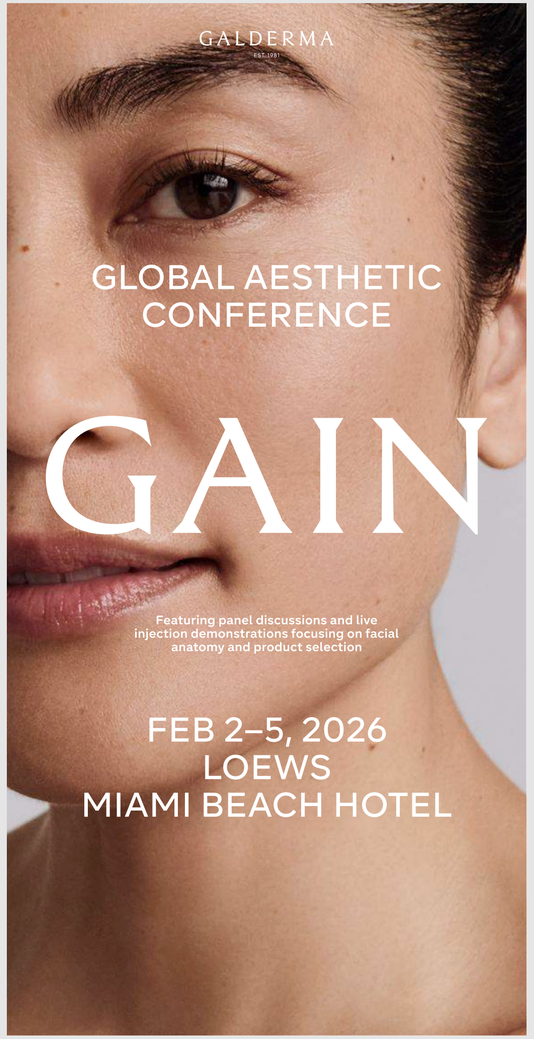
© Galderma 2026

We never print the gradients, so designs must be updated between digital and print applications.

You can see an example here of how we would update a digital visual for use in print, sans gradient.

DIGITAL
Design with gradients
Never printed





PRINT
Design with flat colour or photography
Print production possible

© Galderma 2026

PHOTOGRAPHY

© Galderma 2026

For the imagery, we expand on four categories:

Galderma brand imagery
Speakers & faculties
Locations (cities, centers..)
Press, galas & reportage

© Galderma 2026

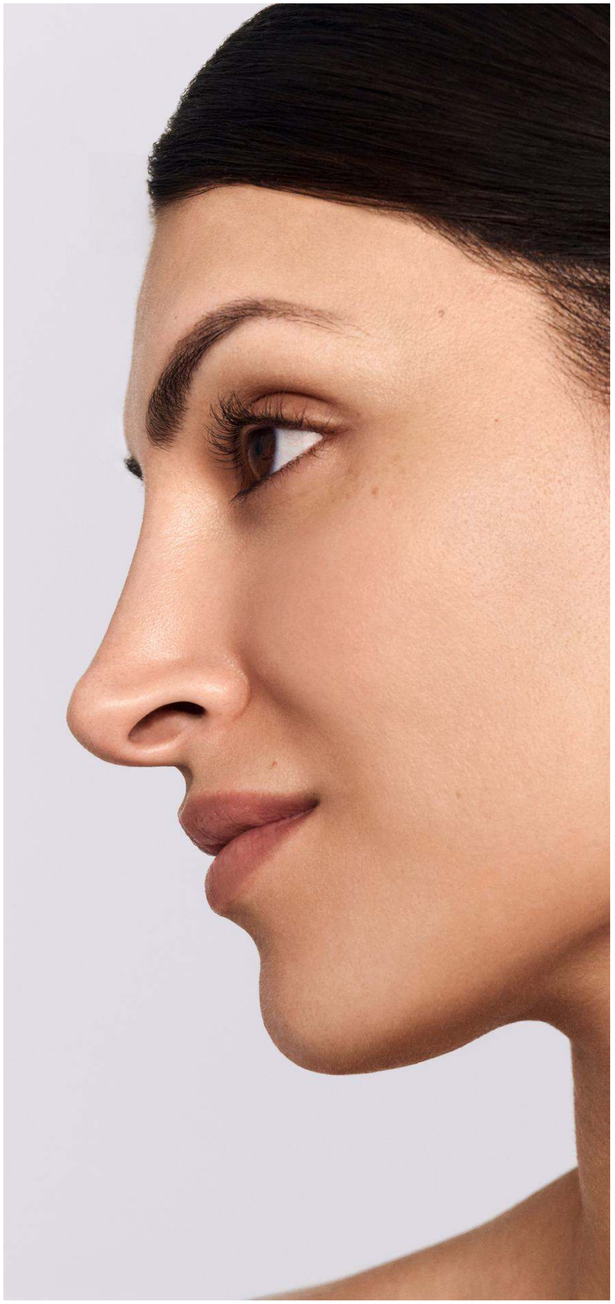
Photography
Brand images

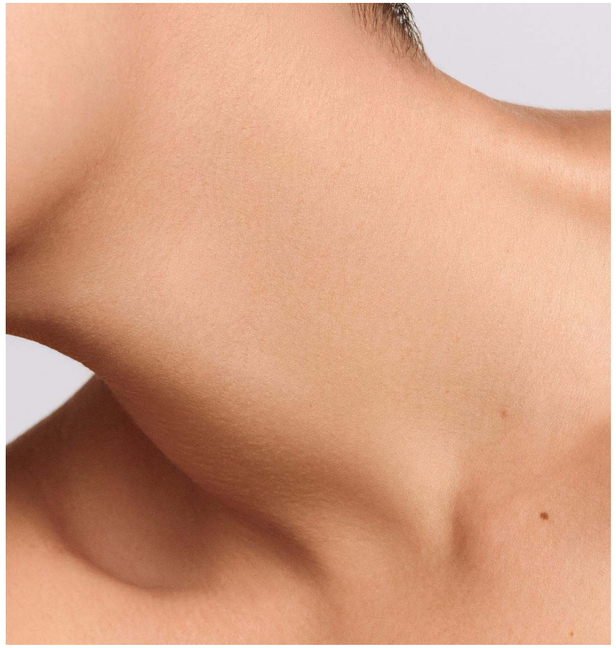
When using Galderma brand images, it is preferable to work with less vibrant images (such as those featuring larger skin zones) so that the fonts appear with better contrast.

For GAIN use coloured brand images.

Where necessary, use a light opacity grey overlay to increase legibility of content on top of photography.

Brand images can be found in the Corporate Brand Center.

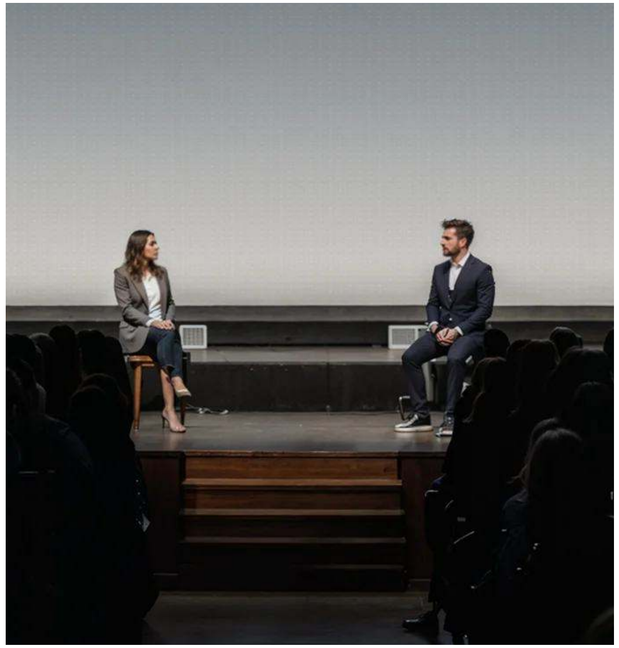




© Galderma 2026

Photography
Speakers & faculties

Professionals: People of confidence and deep knowledge. This category portrays practitioners in a positive light, showcasing their expertise and credibility.



© Galderma 2026

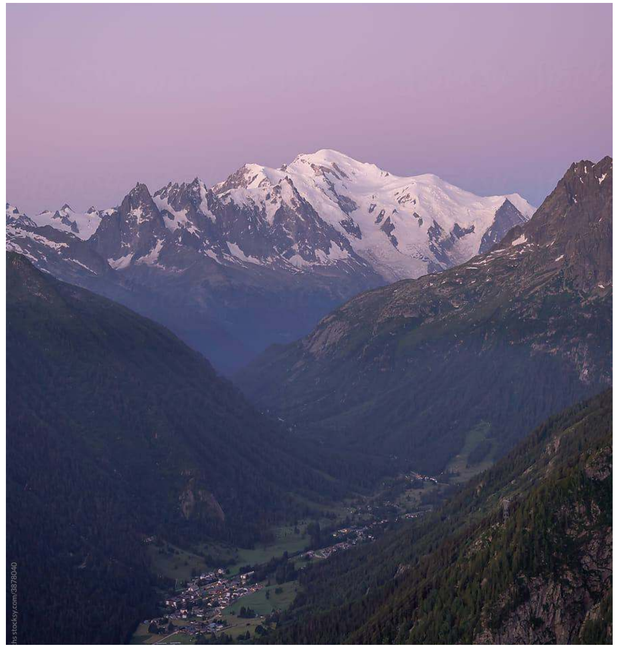
Photography
Locations (cities, centers..)

To enhance readability, when featuring specific locations or areas, we use warm, inviting imagery of those actual places.

All images must have either darker tones or generous negative space to accommodate text overlays. Clarity of both visuals and copy is essential.

We recommend Unsplash for free images.

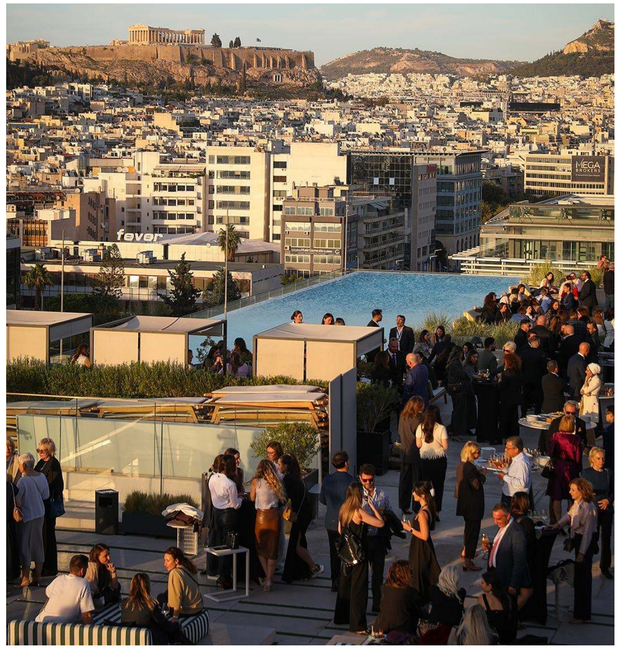
***Do not use AI to create location images.**



© Galderma 2026

Photography
Press, gala & reportage

Behind the scenes, flash lit and less polished. Here GAIN is expressed with liveliness and energy.



© Galderma 2026

INVITATIONS

© Galderma 2026

The invitations are often content heavy, which is why, respecting the hierarchy of the design system is crucial. The goal is to communicate clearly with concise layouts.

Roll-ups

These are physical objects,
therefore print guidelines apply.

© Galderma 2026

Digital banners

© Galderma 2026

DO/DON'T

© Galderma 2026

Following the design guidelines isn't just an aesthetic standard, it's a strategic necessity. Every communication shapes how the world sees GAIN, and inconsistencies, however small, can weaken the brand's identity.

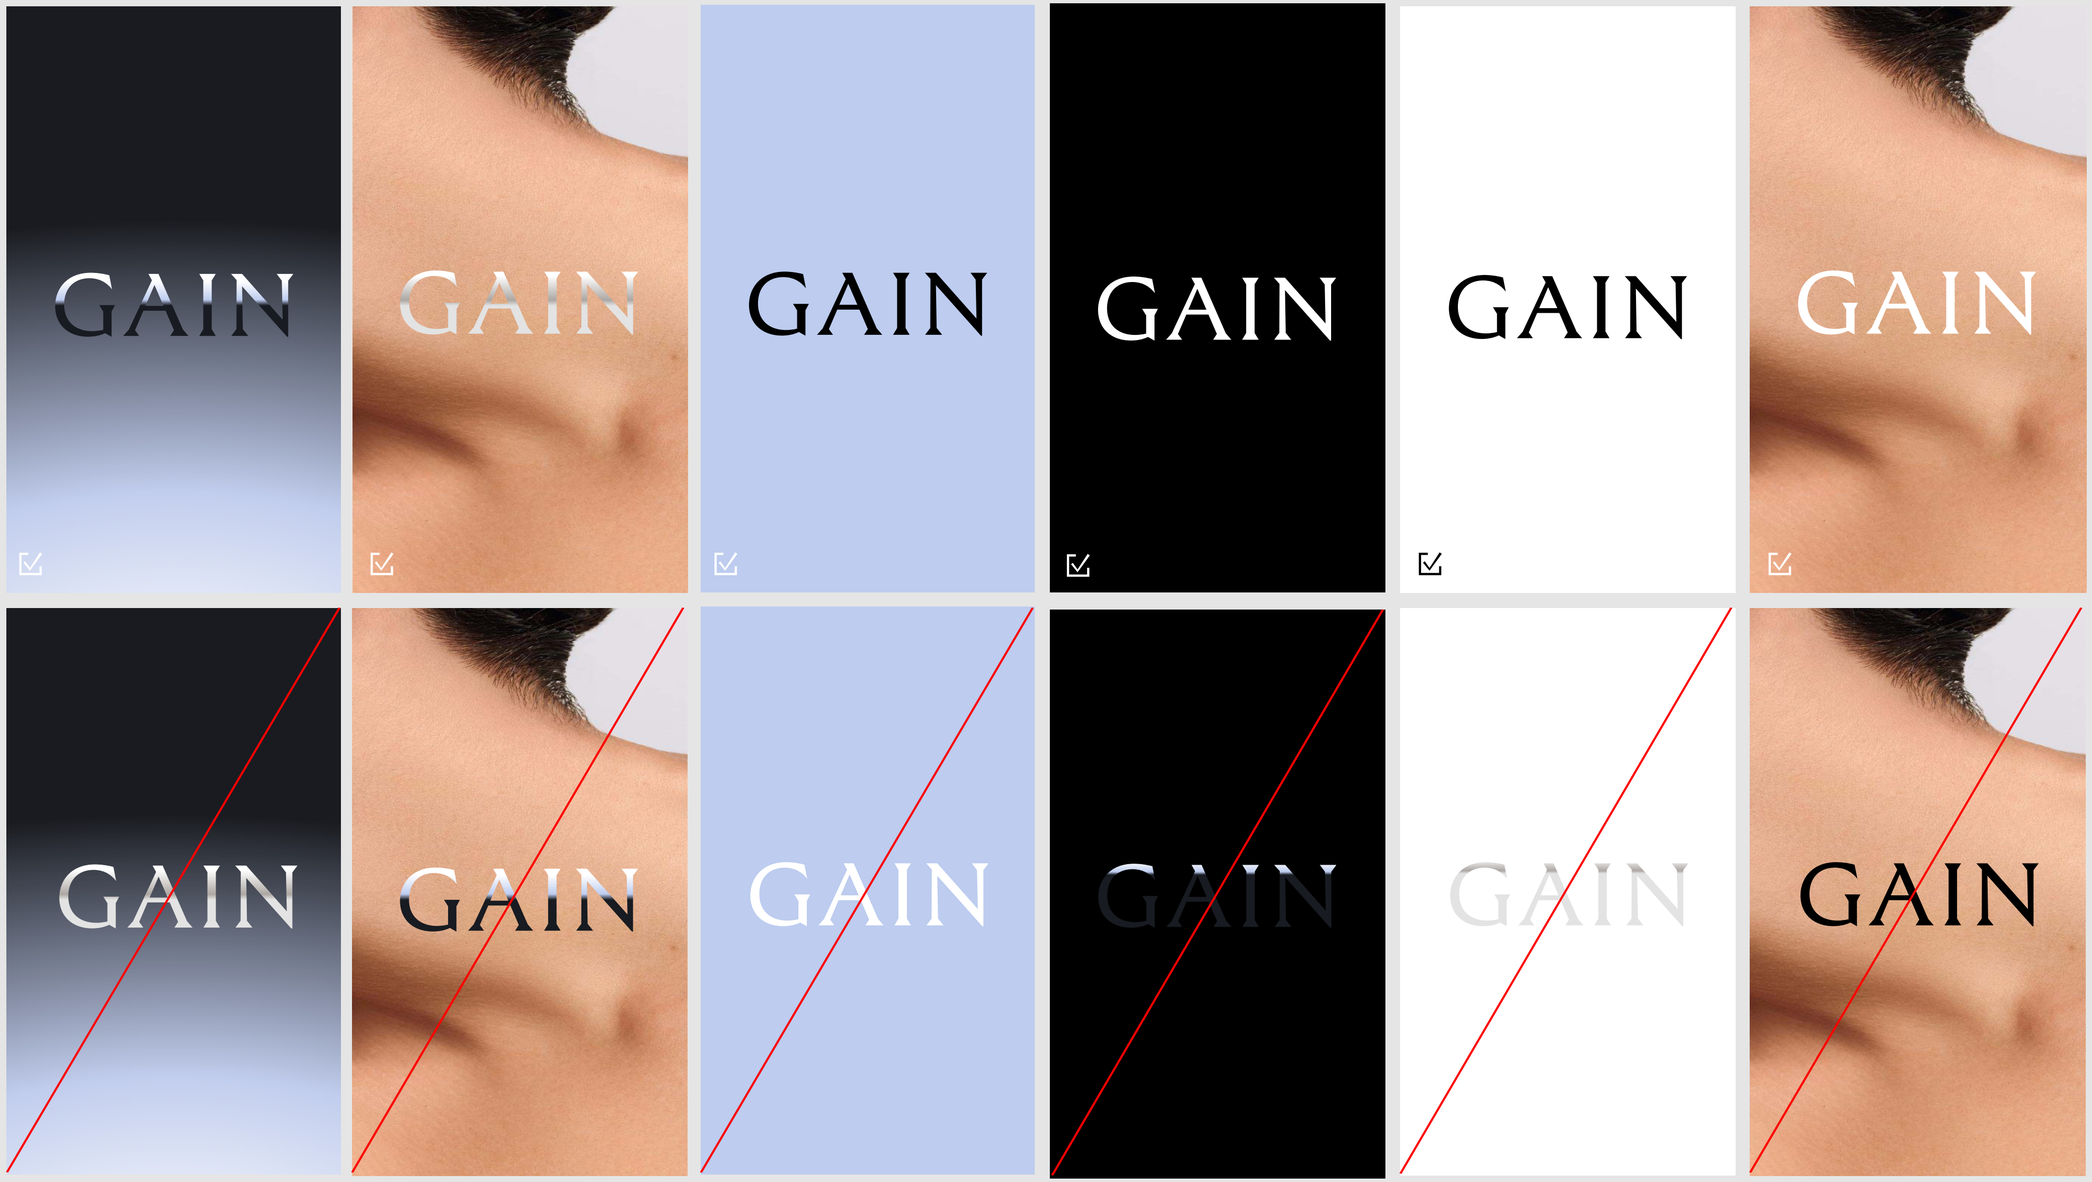
© Galderma 2026

Do/Don’t
Logos

Refer to the earlier sections of this guide to understand the correct usages of logos and colours for digital and print media.

Do not mismatch logos with other backgrounds besides those stated in the relevant sections of this guide.

These acceptable combinations have been selected to ensure legibility and alignment with the Galderma CVI.



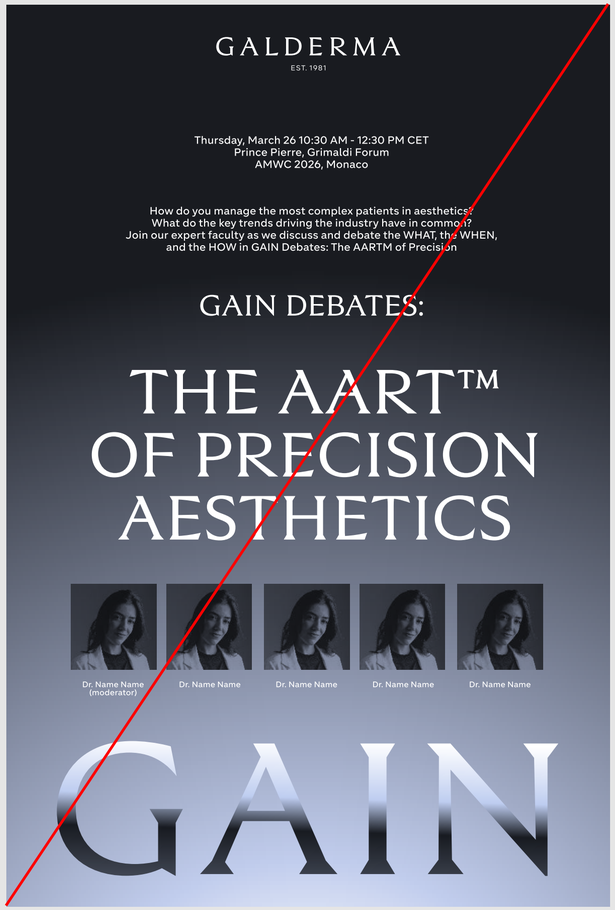
© Galderma 2026

Do not mismatch logos with a other backgrounds colors from the Galderma brand. This applies for all over exsisting colors.

We do not use any colours besides the GAIN palette in our identity.

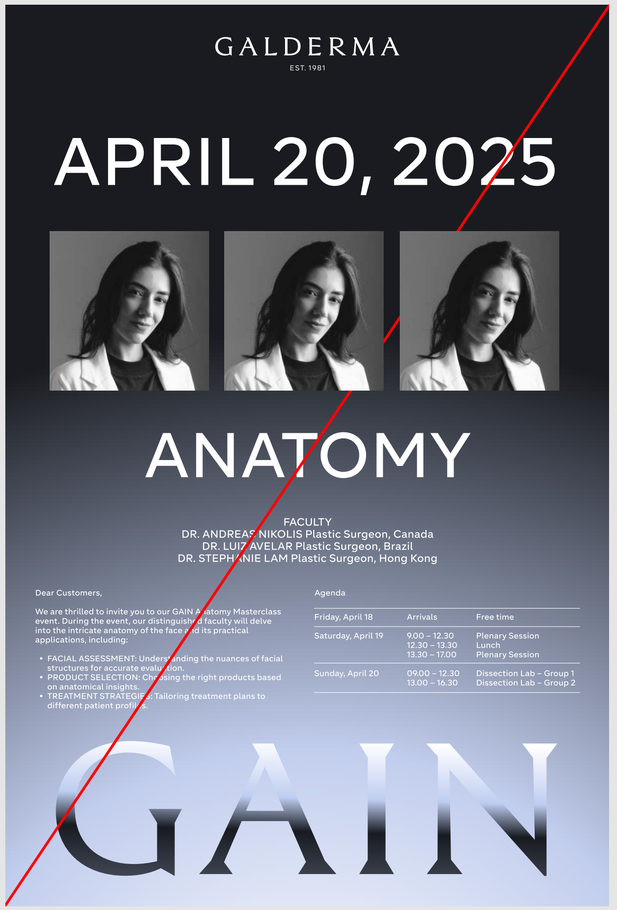
© Galderma 2026

Do not use the Galderma typeface for the headlines. The GAIN brand it mainly expressed through Segma Medium.



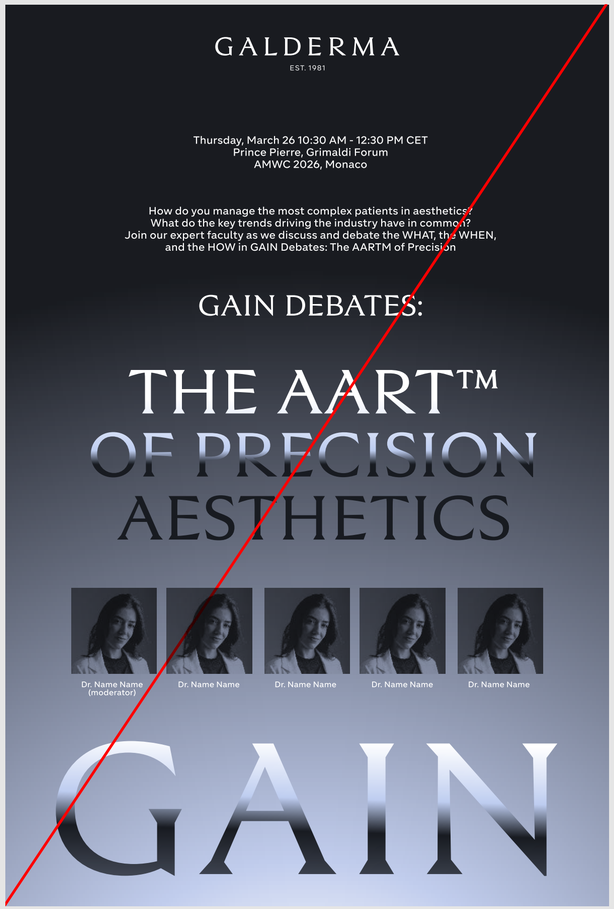
© Galderma 2026

Do not use two headlines (level 1) or more in a layout. Refer to page XX for the proper hierarchy.



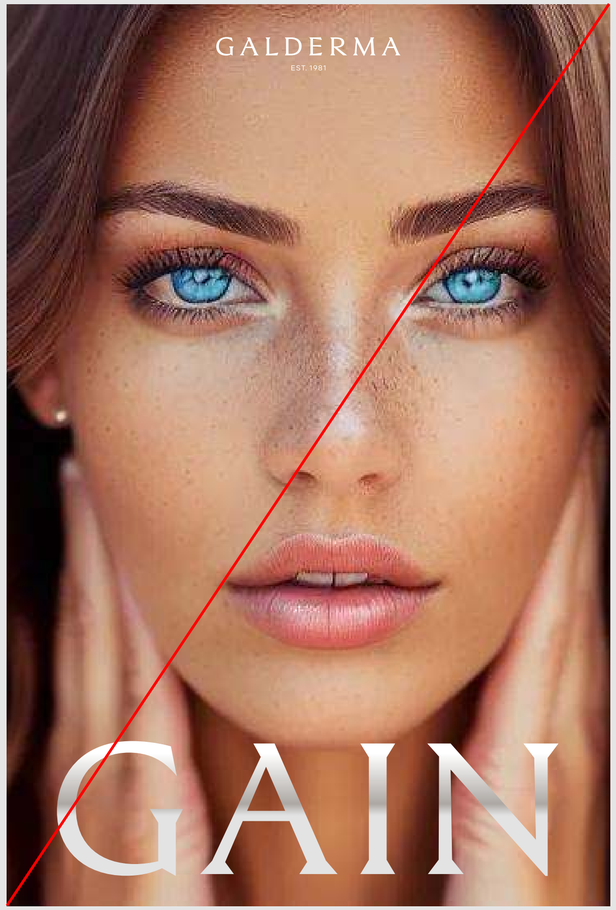
© Galderma 2026

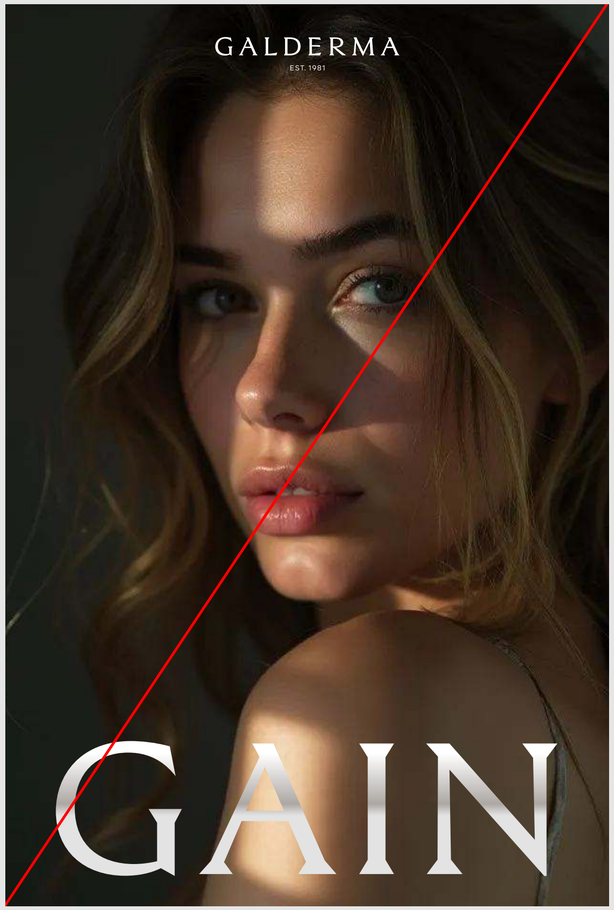
Do not use gradients outside of logos or the lavender/blue background. Other text or visual elements should not use gradients.



© Galderma 2026

Do not use AI to create people in images, we only use real people from brand, campaign or behind the scenes images.





© Galderma 2026

BRANDING CHECKLIST

© Galderma 2026

Before finalizing the artwork, take a moment to ask yourself a few questions to verify that the brand guidelines have been respected. The following pages will help you get started.

© Galderma 2026

Is the GAIN logo aligned properly? At the center or at the bottom?

Does the GAIN logo fit with its appropriate background?

Is the GAIN logo clear and legible?

Centered logo at the bottom

© Galderma 2026

Is the hierarchy respected and legible?

Am I using the appropriate typefaces for the layout?

Are all the headlines typeset in Segma Medium?

© Galderma 2026

Are the background colors/image working with the content?

Are the contrasts between the background and typeface strong enough?

Am I using the appropriate GAIN color palette?

Am I using the correct combinations for digital / print?

© Galderma 2026

When creating a training dedicated to endorsed sub-brands, follow these specific requirements:

1. Use the endorsed brand logo in the same colour as the text on the layout
2. The GAIN logo remains most prominent
3. Use the appropriate brand imagery (do not mix and match from different brands)
4. Maintain GAIN style for all other elements

This layout is a wireframe, not a design example.
